

Transfer of credits from other institutions to Temple College

Temple College will accept most transfer work from all recognized accredited institutions. Core curriculum will be equated course for course, with the indication of a “TR” beside the course. Courses that are not core curriculum are considered as elective credit indicated as “TRNF” in place of the course. Temple College will allow credit for courses in which the grade of “D” or better was obtained. The institutions grade point average is not calculated in the Temple College grade point average.

Temple College does not limit the amount of credits that a student may transfer to the institution. Certain restrictions will apply with residency requirements if the student is seeking a degree with Temple College. Please see Associate degree graduation requirements for more information.

Temple College also accepts military credit elective hours from official military transcripts, Tech Prep credit listed on official high school transcripts with approval from the Tech Prep advisor and Credit by Exam coursework on official transcripts from recognized accredited institutions.

For credit by licensure or certification by the State of Texas, please contact the appropriate department for approval.
