

Editing Web Pages with Internet Explorer 8

Problem: when you try to view the source of a web page when using Internet Explorer 8, you cannot edit the code.

Solution: Set IE to use notepad for editing.

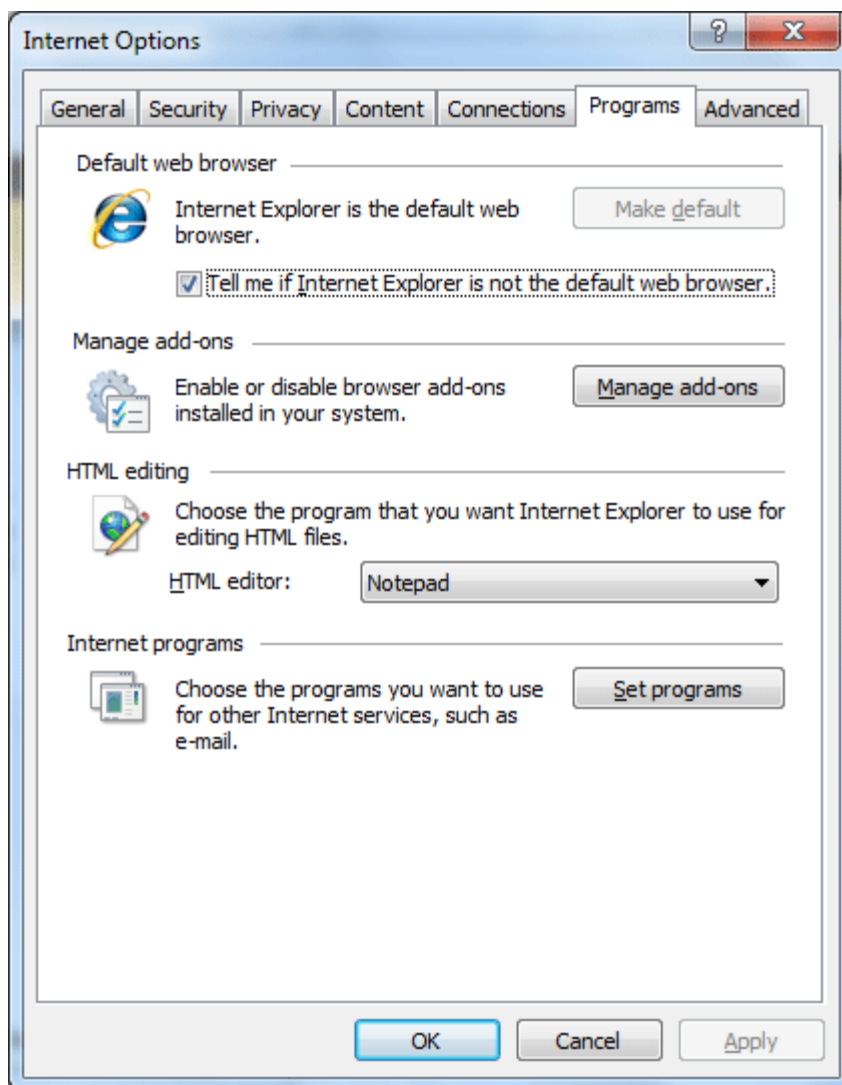

This will require you to set Notepad as the default editor, then add the edit icon to IE 8

Step 1

Choose Tools ▾ on the right side of the Internet Explorer bar;

Choose Programs

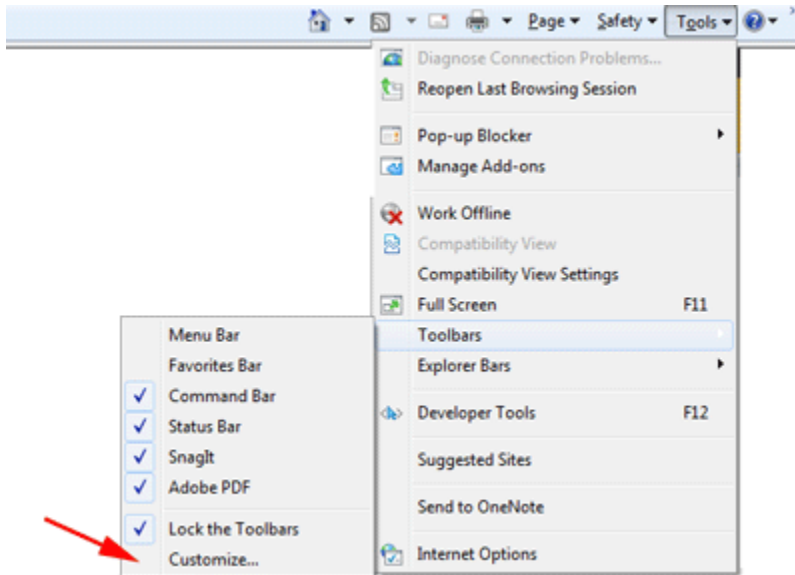

In the dropdown next to HTML editing, choose Notepad.

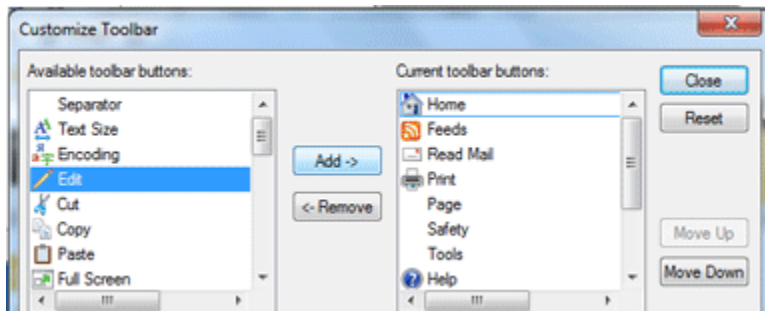

Step 2,

add the edit icon to the tools menu of Internet Explorer 8.

Choose Tools ▾ on the right side of the Internet Explorer bar;
click on Toolbars, then select Customize

Locate the Edit icon, and choose [Add - >]

Now when you need to edit one of your web pages, choose the Edit icon.
