

12 Lead ECG Analysis

1. Rate & Rhythm

- ✓ Rate
- ✓ Underlying Rhythm

2. Ischemia, Injury or Infarction

- ✓ Two or more anatomically contiguous leads
- ✓ Focus on ACUTE Injury/Infarction
- ✓ Don't focus on old injury
- ✓ No injury pattern then "Non-diagnostic for Injury"

3. Axis by Quadrant

- ✓ Choices: RAD, LAD, Normal Axis, Extreme Right Axis Deviation or "No Man's Land"

4. Conduction Defects

- ✓ Right or Left Bundle Branch Block
- ✓ Anterior or Posterior Fascicular Block (Hemiblock)

5. Imitators/Imposters

- ✓ Ventricular or Paced Rhythms
- ✓ LVH
- ✓ LBBB
- ✓ Pericarditis
- ✓ Early Repolarization

6. Coronary Artery Involved

- ✓ Right Coronary Artery
- ✓ Left Coronary Artery
 - ✓ LAD
 - ✓ LCx
 - ✓ Proximal LCA
