Definition of Notes

! Course can be taken before acceptance into the program.

Come talk to an advisor about your Temple College graduation and your university transfer plans.

Program Description

The Emergency Medical Services (EMS) Department offers coursework necessary to prepare students to practice as an EMT, Advanced EMT, or Paramedic and offers a two-year AAS degree in Emergency Medical Services. Graduates are eligible for state and national certification required for employment in the field. The primary role of EMS professionals is to provide patient care in pre-hospital settings and during transfer of patients between health care facilities. They respond to requests for out-of-hospital health care, assess patients, initiate treatment, and if needed, transport patients to appropriate facilities. Care that otherwise would be available only in an emergency department is taken into the community. Admission to the EMS program requires a separate application in addition to admission to Temple College. Application requirements for each program are listed in the college catalog. Additional information may be found in the application packet or on the Department website.
