Did You Know?

Temple College and OneDrive

The Information Technology Team prefers you save your files to OneDrive versus your local computer!!

Organized. Protected. Connected.

Anywhere access

Enjoy the freedom to access, edit, and share your files on all your devices, wherever you are.

Back up and protect

If you lose your device, you won't lose your files and photos when they're saved in OneDrive.

Share and collaborate

Stay connected, share your documents and photos with friends and family, and collaborate in real time with Office apps.

Microsoft OneDrive Offers more than just file storage

OneDrive is the Microsoft cloud service that connects you to all your files. It lets you store and protect your files, share them with others, and get to them from anywhere on all your devices.

Below are some links to learning paths that we suggest you review:

[Introduction to OneDrive](#)

[Using OneDrive](#)

[Manage, Monitor and remediate Data Lifecycle Management](#)

[Share Files and Folders](#)

[Coauthoring Documents](#)

[Sync Files with the OneDrive App](#)

[Summery and Knowledge Check](#)

Here is a link to more OneDrive Video Training - [OneDrive Video](#)

Contact the Help Desk today to get OneDrive setup!!!

What You Need to Know!

Multi-Factor Authentication

Multi-factor authentication is a process in which users are prompted during the sign-in process for an additional form of identification, such as a code on their cellphone or a fingerprint scan.

If you only use a password to authenticate a user, it leaves an insecure vector for attack. If the password is weak or has been exposed elsewhere, an attacker could be using it to gain access. When you require a second form of authentication, security is increased because this additional factor isn't something that's easy for an attacker to obtain or duplicate.

Temple College is required by the State of Texas to move to MFA for Office365 in the near future!

WHAT HAPPENED ON JULY 9TH

Tron ad

July 9, 1982

Disney Releases the Tron Movie

Disney released *Tron*, the first mainstream film to use extensive computer-generated graphics and special effects. Starring Jeff Bridges, the film also had a computer-related plot in which a programmer is transported into a computer to fight a program called Master Control and replace it with the more reliable Tron system.

Keyboards and Computers, Together at Last!

July 4, 1956

MIT's Whirlwind, which had been completed five years earlier, becomes the first computer in the world to allow its users to enter commands through a keyboard. Previously, all input was accomplished through dials, switches, and/or punch cards.
