Definition of Notes

! Course can be taken before acceptance into the program.

! Come talk to an advisor about your Temple College graduation and your university transfer plans.

Program Description

Respiratory Care is a health specialty involved in the assessment, treatment and management of patients with cardiopulmonary disorders. The respiratory therapist is an expert in the use of therapeutic gases, ventilatory support, bronchopulmonary drainage, breathing exercises, CPR, aerosol administration, and management of the natural and artificial airway. Therapists are also involved in diagnostic testing and monitoring of cardiopulmonary function: including, measurement of lung volumes, pressures, flows, blood gas analysis, electrocardiograms, stress testing, sleep studies, smoking cessation, assisting with bronchoscopy, pulmonary rehabilitation, and asthma management.
