

INTRO TO DATA NETWORKS

ITNW 1004

This course explains computer networking in basic terms you can easily understand. A brief overview of networking history explaining how networks became so important to businesses and individuals is followed by a detailed introduction to network architecture, hardware, software and security. The course emphasizes networking fundamentals, explaining how software and hardware make networking possible. The course stresses understanding how and why networks work, rather than focusing on rote memorization of networking terms or definitions.

Course Schedule

New classes start every two weeks.

Course Cost

\$175
